

β Gem (Pollux) - all sectors

K0IIIb, $V = 1.16$, variability class: RG, high-pass filter width = 0.5 d

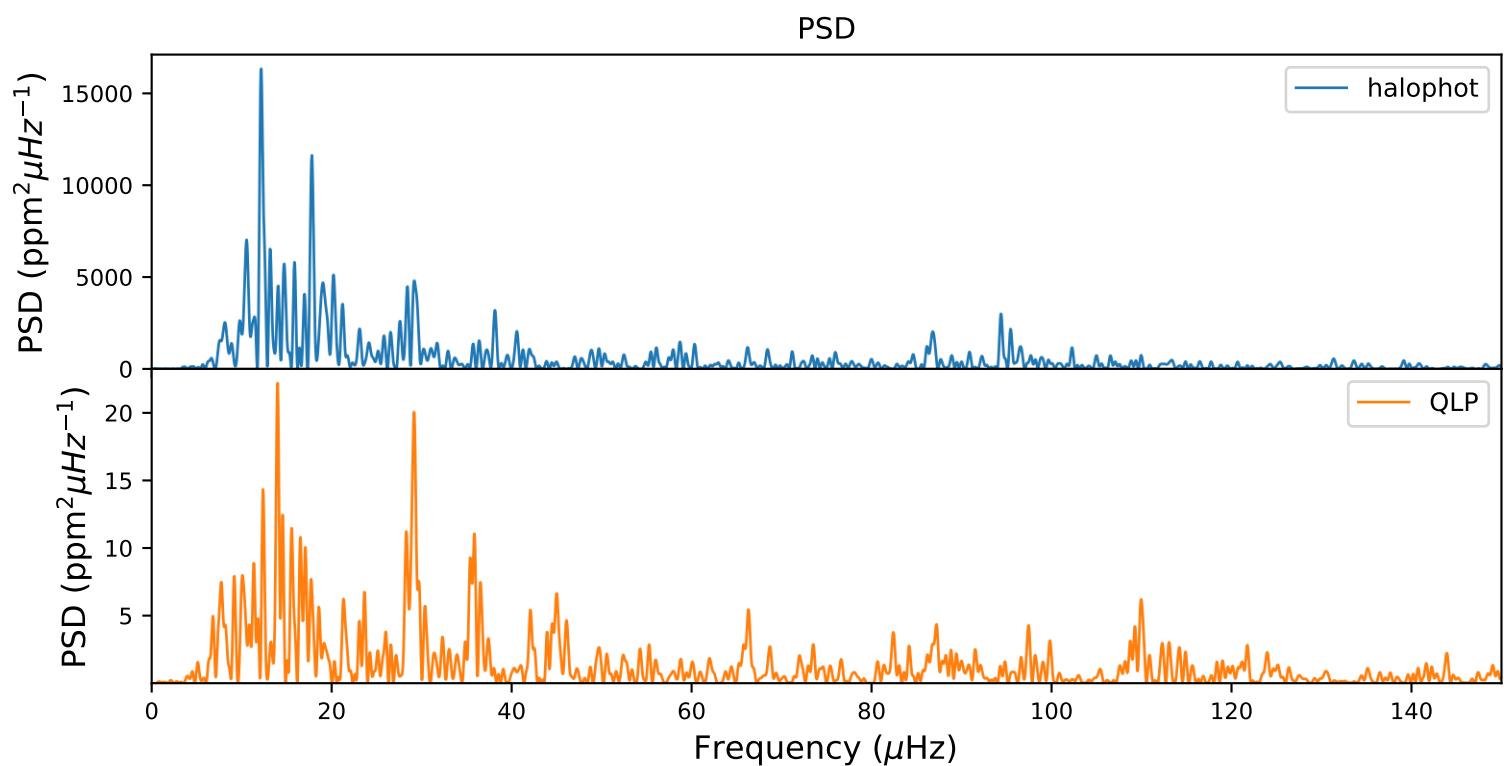

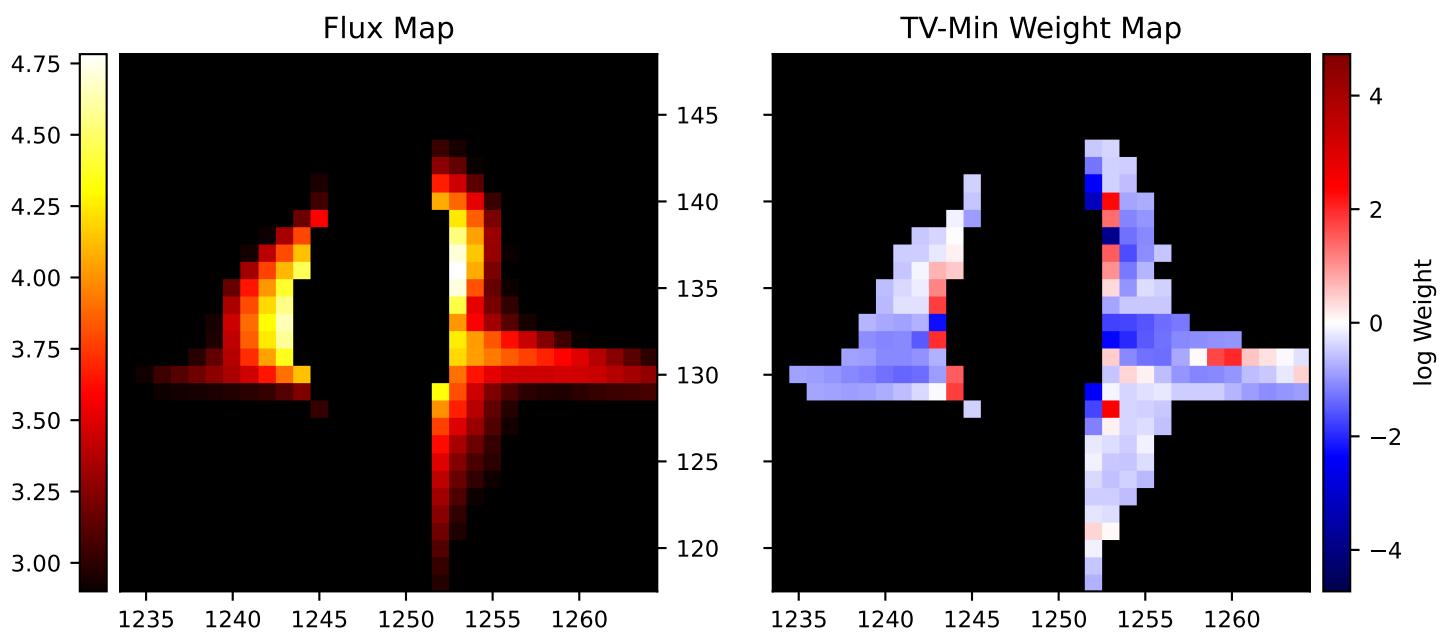

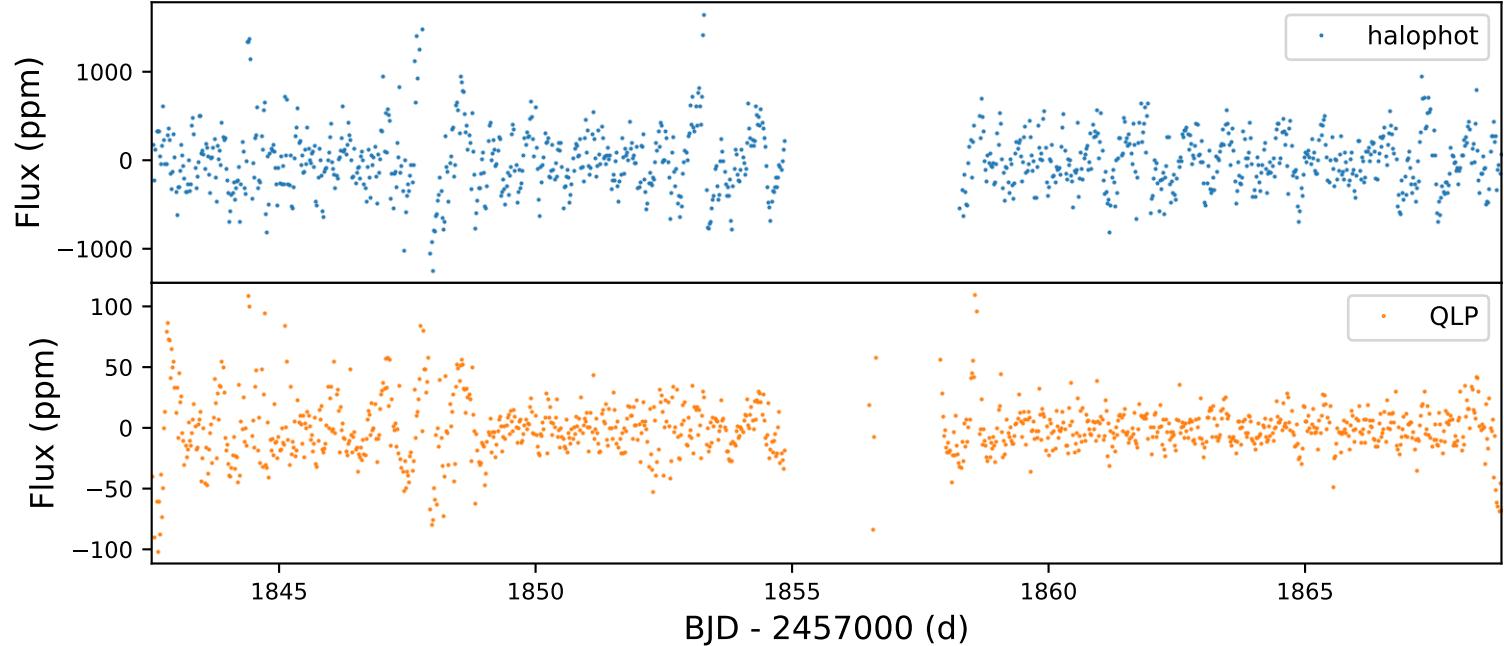

Power Spectral Density

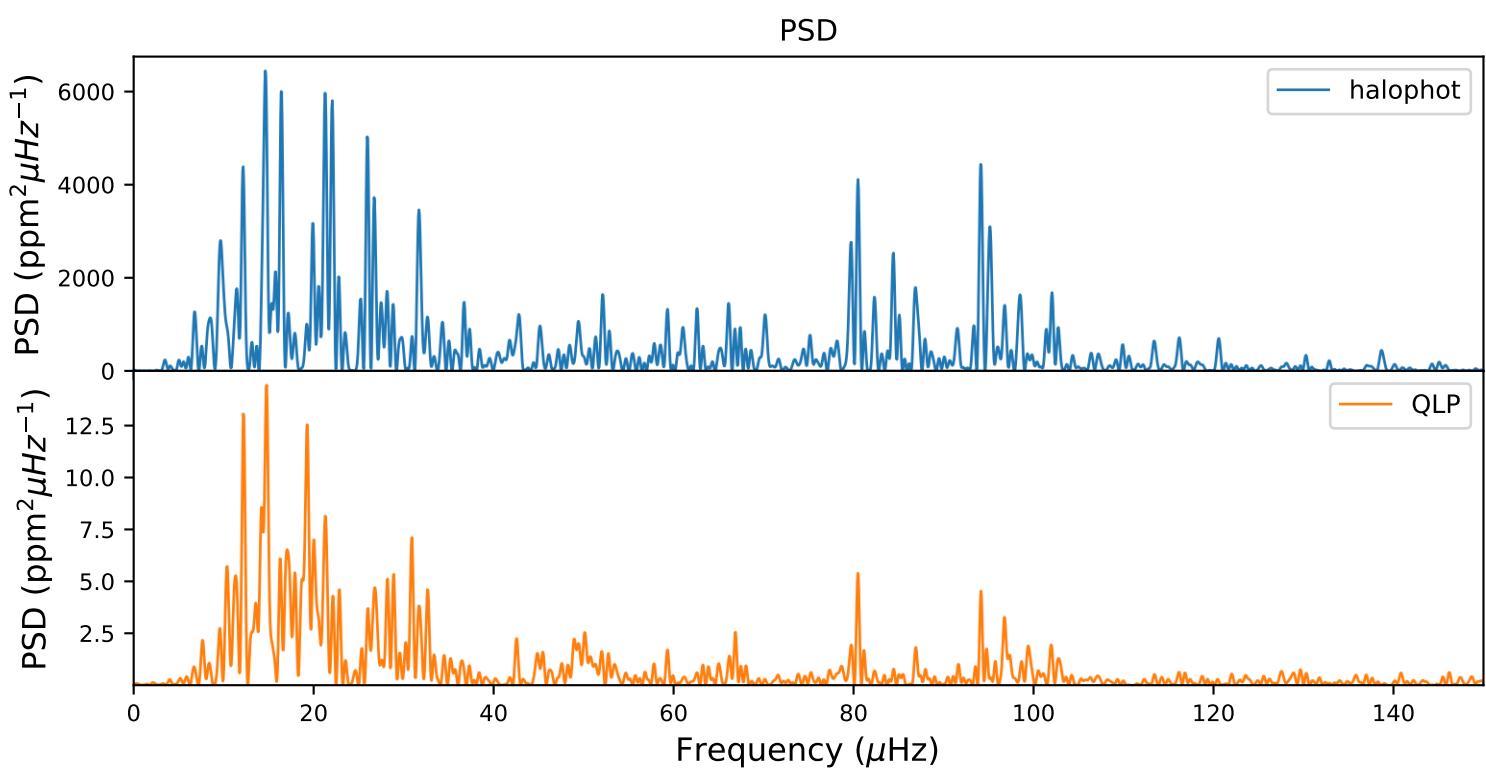

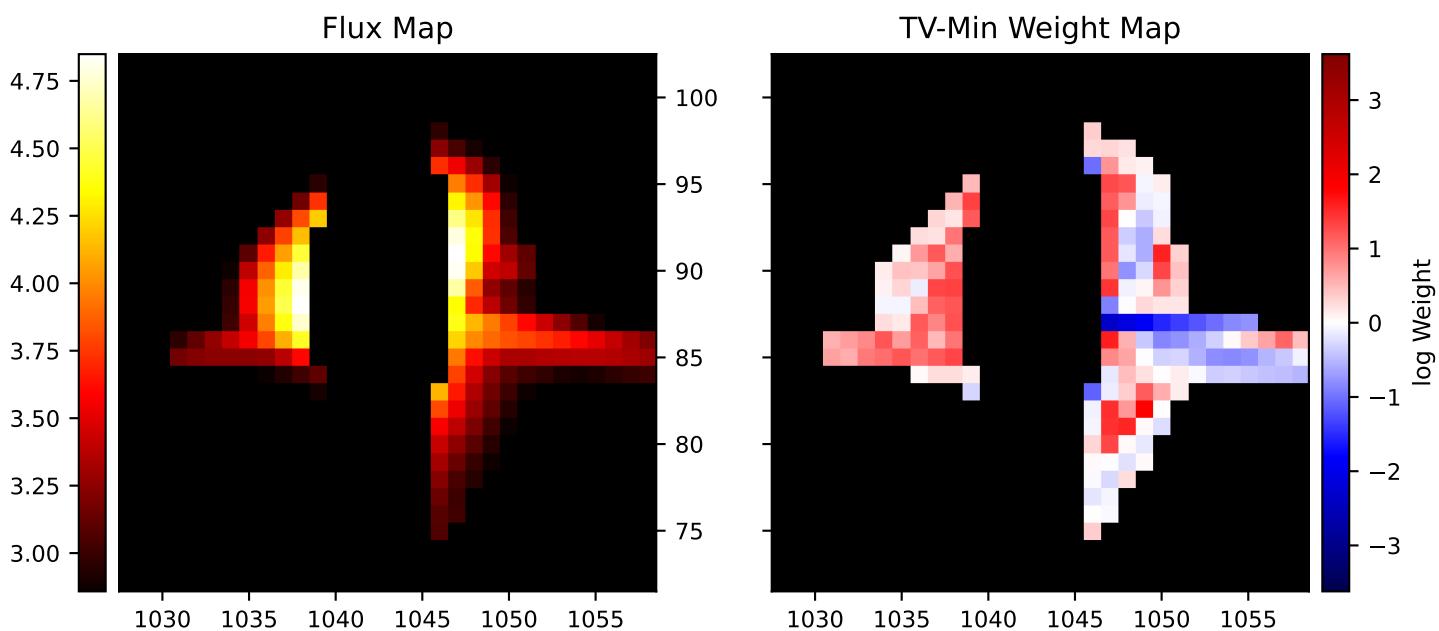

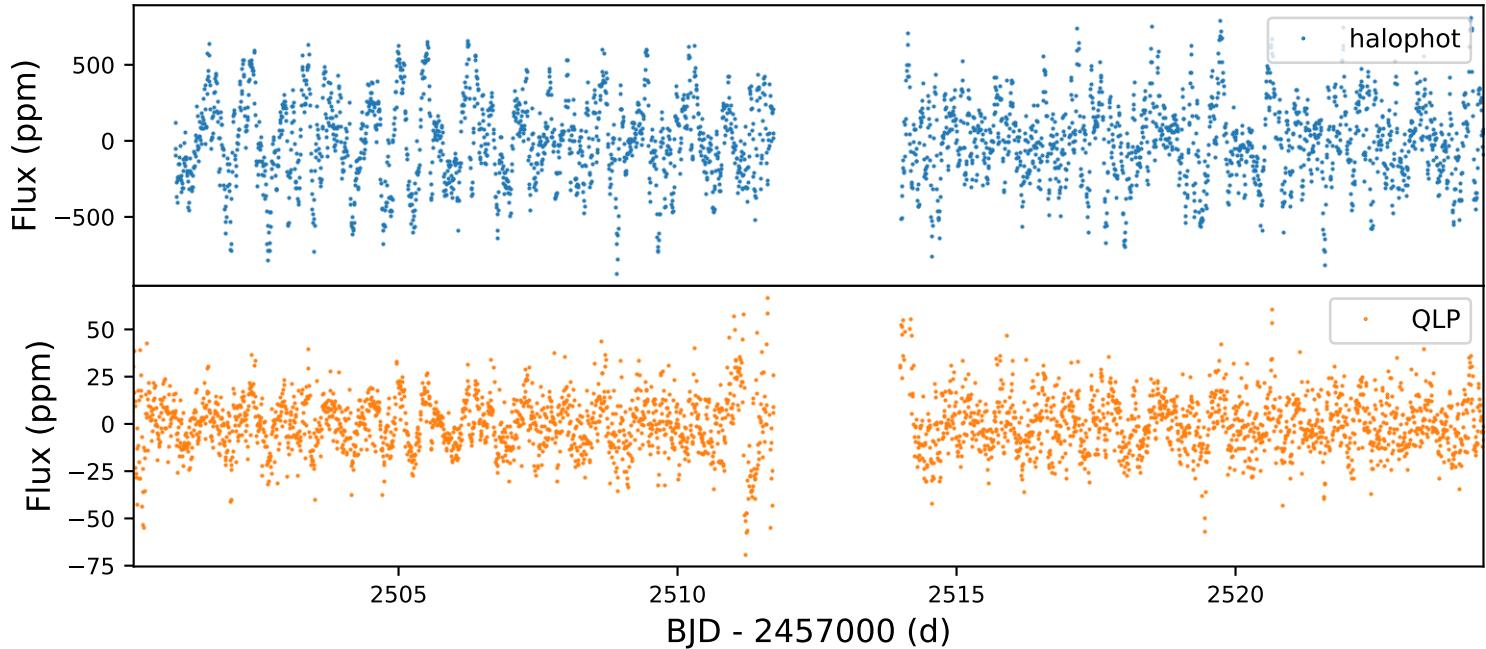

β Gem (Pollux) - Sector 20

Light curve quality: halophot = high, pipeline = low

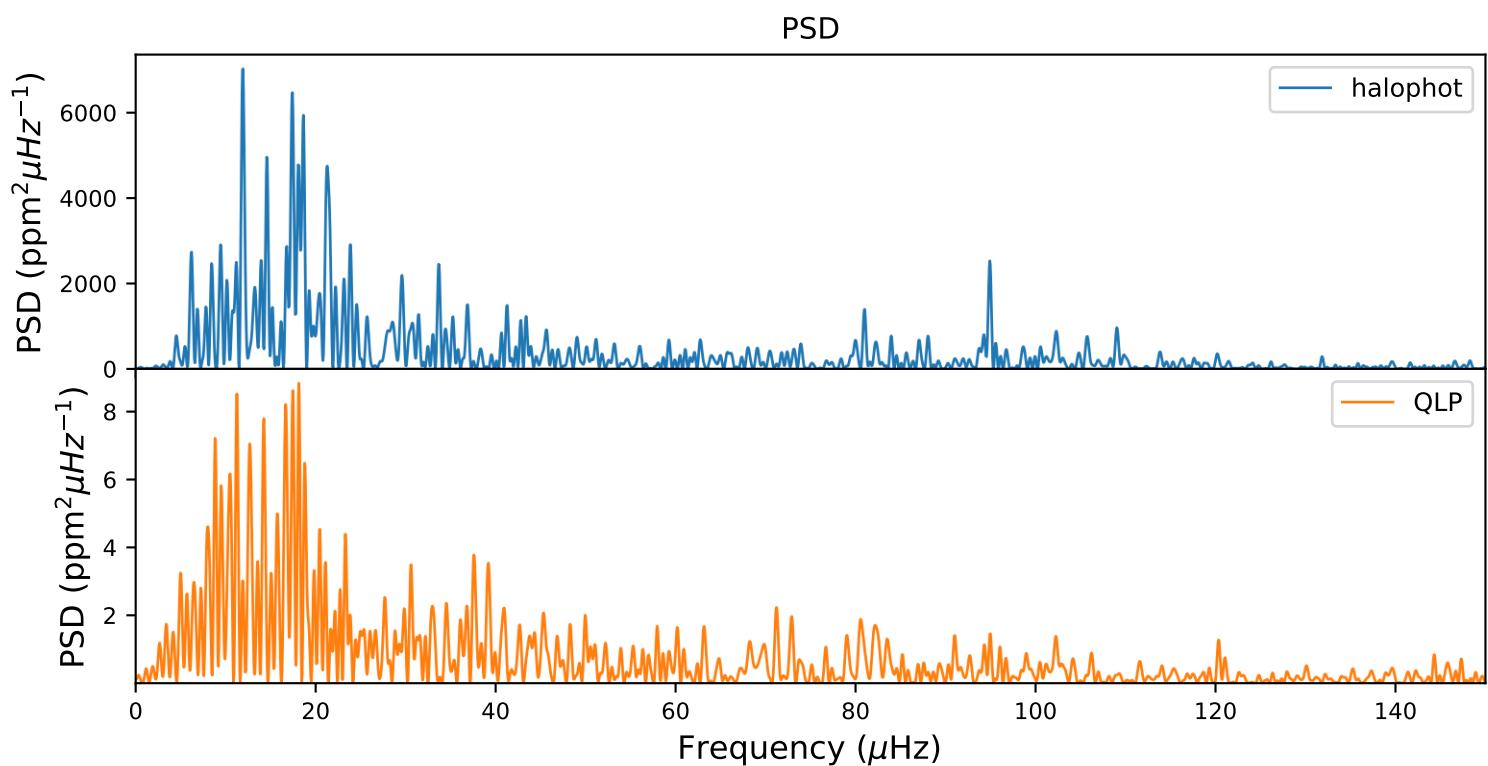

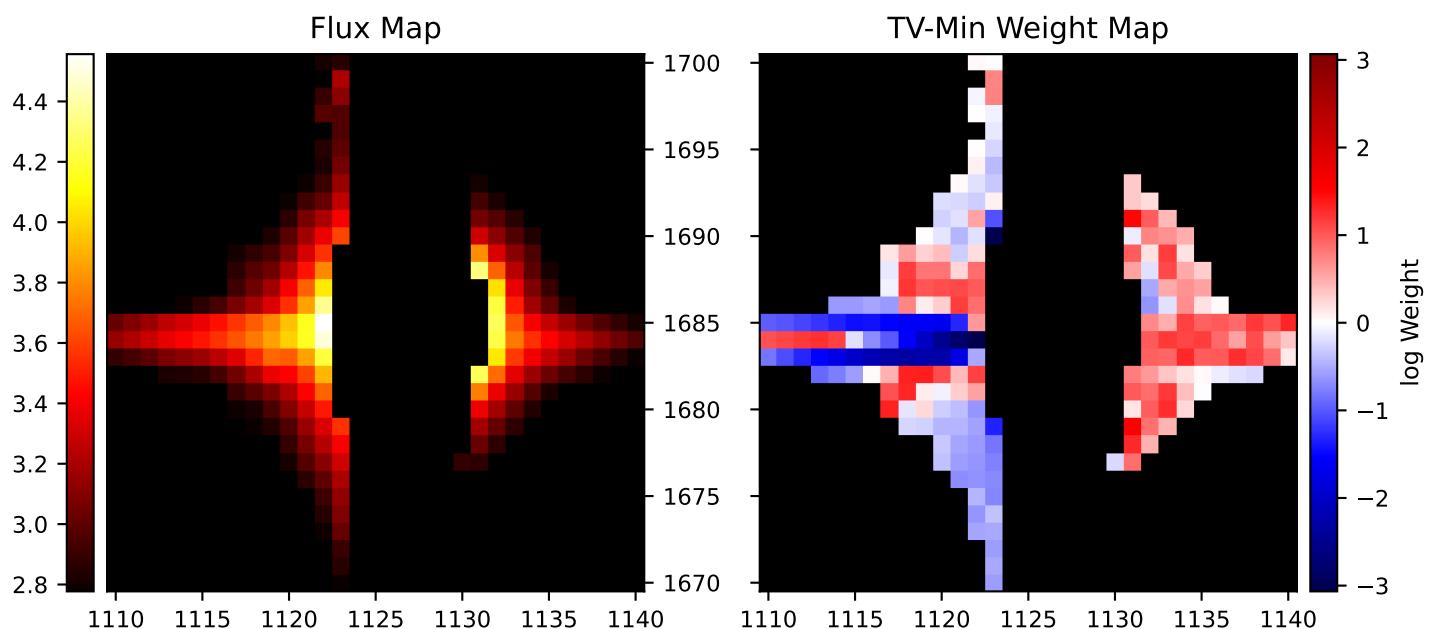

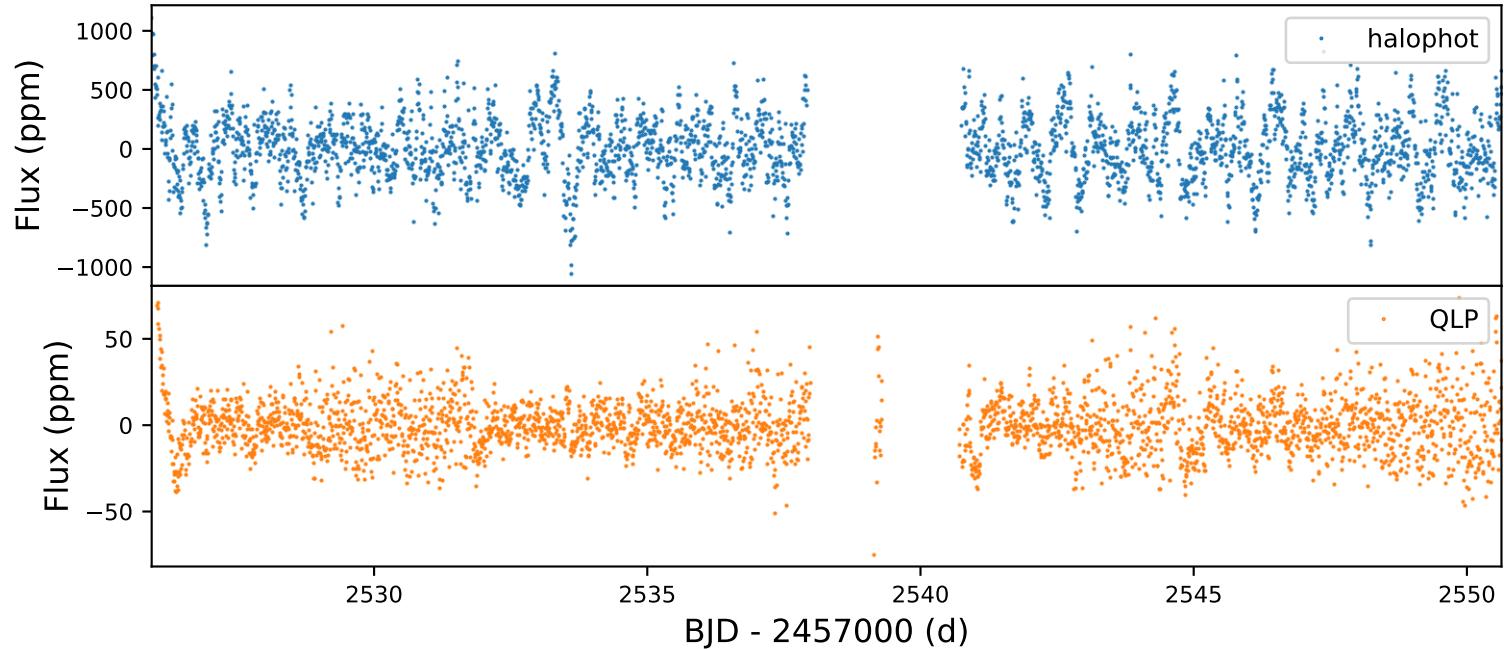

β Gem (Pollux) - Sector 44

Light curve quality: halophot = high, pipeline = low

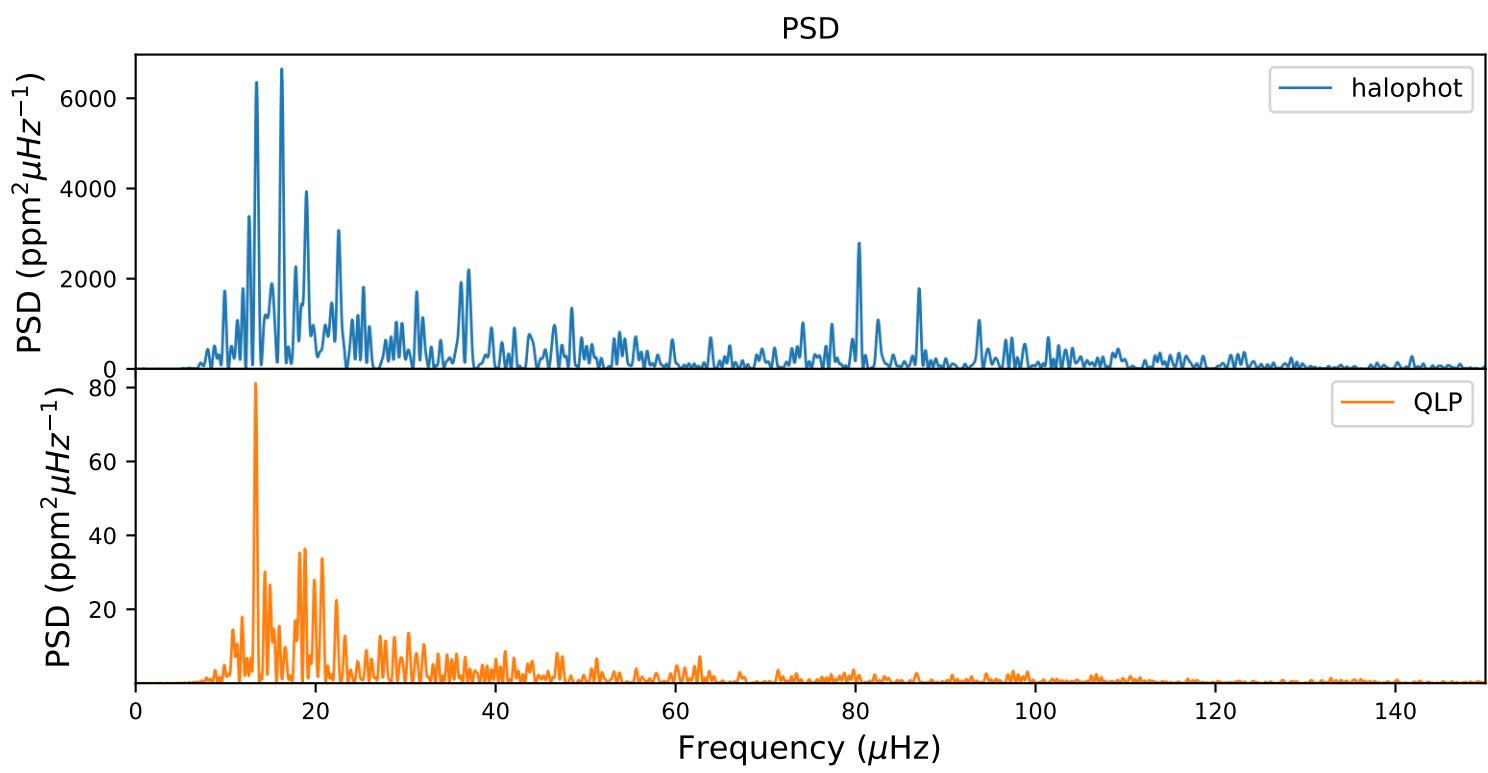

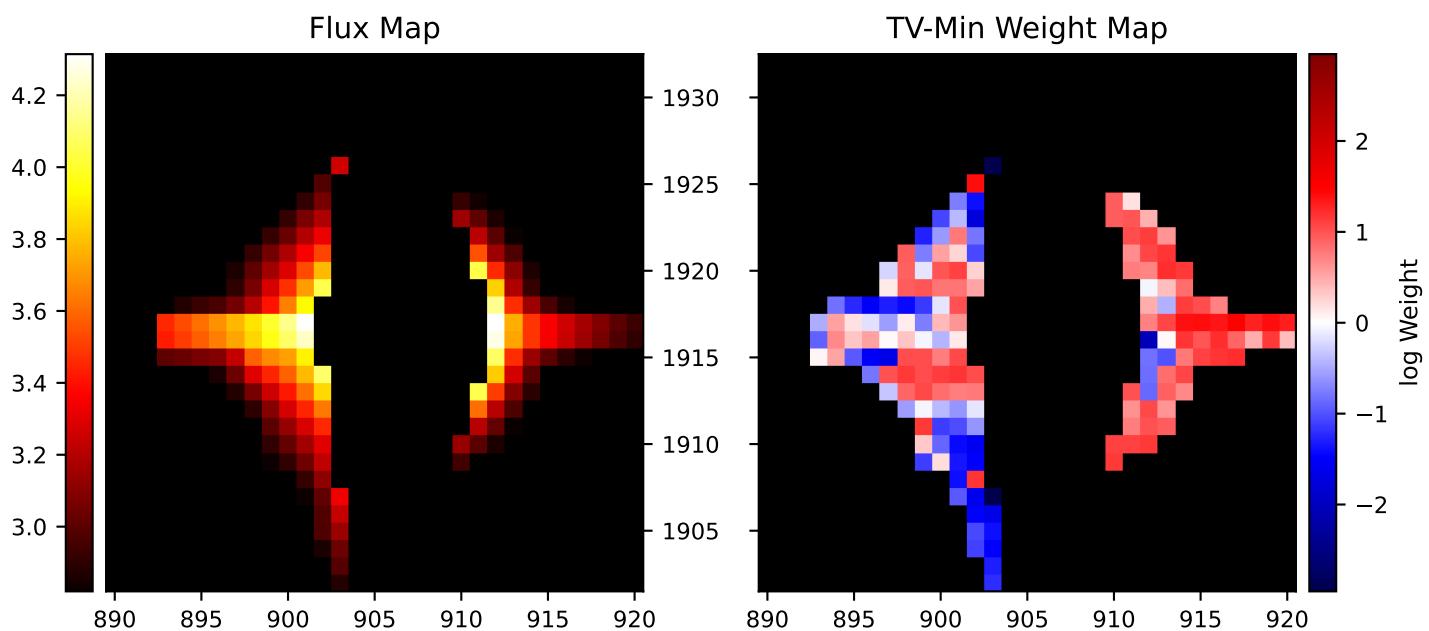

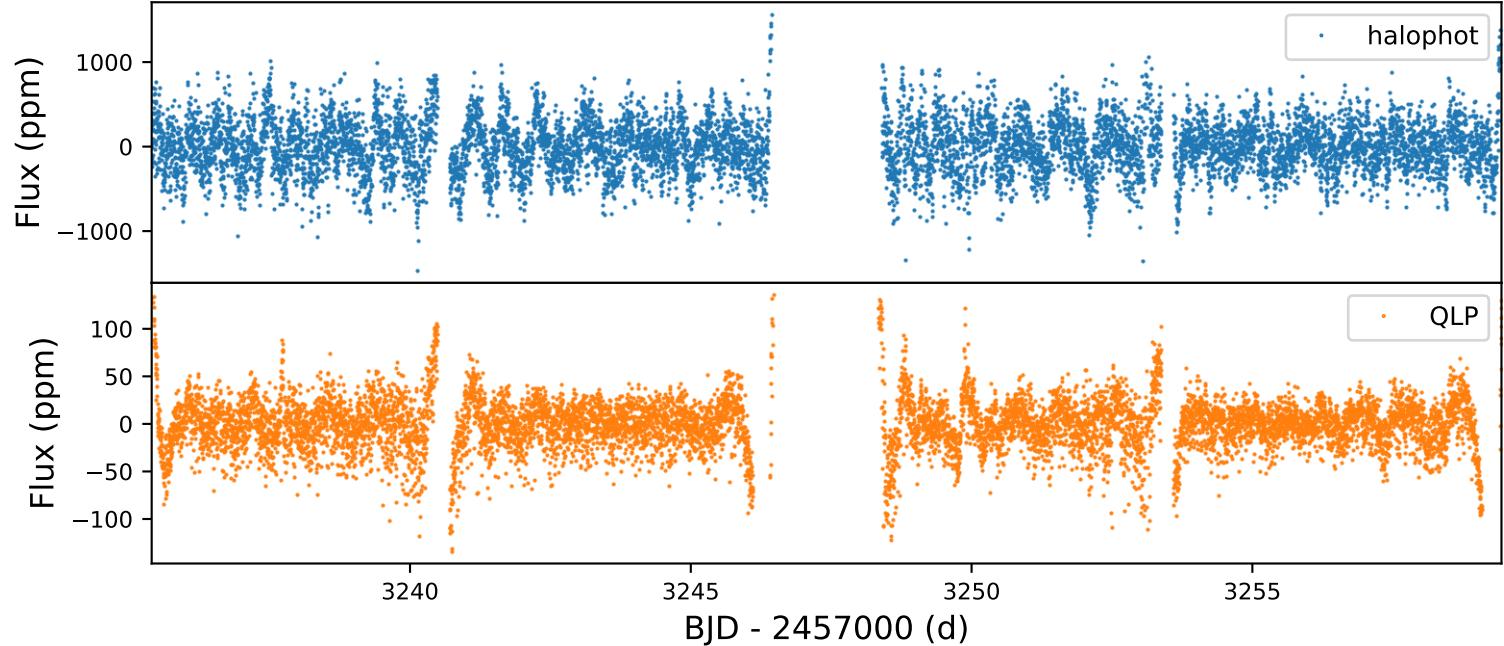

β Gem (Pollux) - Sector 45

Light curve quality: halophot = high, pipeline = low

β Gem (Pollux) - Sector 71

Light curve quality: halophot = high, pipeline = low

β Gem (Pollux) - Sector 72

Light curve quality: halophot = high, pipeline = low
